such as the work of Piaget, would suggest that there are stages of development through which all children must pass on their journey to adulthood. Against this is the consideration that in many contexts childhood has necessarily been abbreviated and curtailed allowing no possibility of a childhood in the form that we currently understand it. In these historical contexts, does it make sense to ...

The modern idea of childhood being separated from adulthood life, started to develop throughout the sixteenth century. Middle class parents began to demand some form of formal educational system for their sons. Consequently, schooling for boys started getting popular. This revolutionary social attitude towards children and childhood, now requested new educational provisions. The number of new ...

Child development that occurs from birth to adulthood was largely ignored throughout much of human history. Children were often viewed simply as small versions of adults and little attention was paid to the many advances in cognitive abilities, language usage, and physical growth that occur during childhood and adolescence. Interest in the field of child development finally began to emerge ...

Children's acquisition of language is an equally troublesome area of research insofar as children are not subject to the researcher's manipulation like any other variable. Moreover, unlike the ideal variable in the study, a child's linguistic development does not occur in a vacuum: it coincides temporally with not only physical/motor growth, but also cognitive, perceptual, and social ...

Mintz: We often think of the history of childhood as the history of its liberation, that is, the kids in the past were servants, or they were apprentices, and that their lives were really regimented. If you were female, you spent your childhood spinning thread or doing menial chores. If you were a boy, you worked in a factory, or you worked in a shop.

Understanding child development can help the early childhood educator set realistic objectives for the child's learning and create reasonable expectations for growth and behavior. For example, the American Academy of Pediatrics (AAP) notes that a 2-year-old has little control over emotional impulses. An educator who understands that it is normal for a toddler to have the occasional outburst ...
