The Human Development Index (HDI) for South Africa is also low, 0,674, ranking the country 121st out of 177 countries with data. For the period 1996 to 2006, there has actually been a slight rise in inequality in South Africa as a whole. (ECORYS 2008:35). Hence, a developmental state would invest more in education, health and social infrastructure. This is indeed what President Zuma proposed ...

the years to 2020 will largely be driven by developments resulting from far-reaching economic and social changes. By 2020, real estate managers will have a broader range of opportunities, with greater risks and new value drivers. As real estate is a business with long development cycles – from planning to construction takes several years – now is the time to plan for these changes. "High ...
