Passions Within Reason is a great early example of popular economics. Frank does a superb job of boiling down his insights into plain language (not an achievement to go unremarked). The main thesis is that while emotions may appear irrational (and possibly be a knock against rational choice theory), if averaged over many people, emotions can be seen as commit mechanisms that allow for mutual cooperation within a population. So we have comments like "if character traits are discernible, in order

Passions within Reason is a remarkably prescient and insightful book, drawing upon behavioral research of the decade leading to its publication (1988). It is also a rather subtle book. Even though I used in in a college course I taught in 1989, I do not believe I really understood it until I reread it very recently.

The Proper Role of Emotions (or Passions) So the goal isn't to reject EorP altogether but to have a balanced emotional life. Think joy rather than pleasure, caution rather than fear, or reasonable hope rather than appetite. As for distress, we should reject it completely. So the Stoics oppose EorP that psychologically manipulate us, thereby undermining our reason and volition, not that we ...

Indeed, all our interesting and engaging moments involve our emotions (or "passions"). Convincingly, I could not find a counter instance in my life to refute this claim. The "function" of reason is to prioritize, analyze, and utilize these emotions to our maximal benefit. It's only when we won't allow reason a mediating voice in our emotional ...
