Although z/OS utilities provide functions that are better performed by newer applications, many customers continue to use these programs, and IBM continues to ship them for compatibility with older supported system levels. This guide lists the tasks for which you can use these utilities, and identifies which utility is especially suited to perform each task.

Thought I would give this another try. I just installed XMITIP 10.10 and have executed the IVPJOB. We are using ZIP390 6.0 and I see these errors in STEP IVP7 of the IVPJOB which appears to be an APF abend:

[Update to XMITIP Version 09.03 \(final\)](#)

To send emails from mainframe we can invoke XMITIP command from REXX. OPTIMIZATION PROBLEMS Optimization efforts in such automation process are focused first of all on reduction of execution time (CPU). The SAS reporting program, which is going to be invoked multiple times, should run as fast as possible and also should produce as less as possible log messages. The HTML code used to format the ...

[\[DOC\] Apa Umentation Guidelines](#)

a nice write up in the XMITIP doc on how to configure UDP for mailing. Overload somebody else's resources. Also with today's technology can insert a special distribution box for just that. Darren has had IBM-Main on one for years. There's architectural, networking and DR considerations but that's what makes it interesting.

[\[EPUB\] Nursing Home Physician Visit Umentation Template](#)

The XMITIP doc says that it will handle dsnames the same as TSO, that is, partially qualified names get your prefix added, and fully qualified dsnames must be inside single quotes. I think you are just running into the way TSO parses the quotes. You may need to make sure the quotes get passed into XMITIP by doubling them. For example: EX 'SYS2.LOCAL.CLIST(XMITIP)' ""TM#T.M.XMITIP.PARMCARD ...

The MSGDS defines a data set name, sequential or a member of a partitioned data set, which contains text . that will be included in the message portion of the e-mail. Its use is mutually exclusive of the other MSGxx . keywords. The syntax is: MSGDS data-set ...

[Download Shopping System Umentation](#)

@AndreiKaliachka - XMIT on the mainframe is purely for sending files to another system; it is not a replacement for email and does not have a subject. XMITIP is different from XMIT, as it is an email program. – Steve Ives Jun 8 '16 at 9:21

[NLS Support - IBM](#)

Suggest you talk with whoever supports xmitip on your system as there are system-specific things you need to deal with. The approach of just trying things willy-nilly with no thought as to why they are being tried usually causes this kind of problems. Someone with the correct perspective of how things are configured on your system will be the best help. Hope this helps, d.sch. dick scherrer ...
