Approved for public release; distribution is unlimited.This thesis addresses the issue of interoperability in DoD legacy system databases and evaluates XML as a tool for transferring message data between varied systems. With the demands for increased communication, the dire requirement for a common mode of information transfer is greatly realized. Many legacy systems have developed their own unique interfaces. XML is one solution which can help ease the transition to a common interface. This ...

XML brought about a technique where you could also define parent child relationships within the data storage/transfer medium without having to have another specialized table just to show the relationships. For some databases, this made adding new records very easy (look up multivalued databases, or for something modern, MongoDB). For others, it was just a simple matter of building cursors to ...

[Best XML Database Banking, Healthcare, Media](#)

Data integration solutions may use XML to automate the exchange of data. In general, with an integration solution, XML serves as an interface layer or wrapper for data being passed between data sources, making it possible for a wide variety of applications, legacy systems, and databases to exchange information. XML can thus be said to be Web-style Electronic Data Interchange (EDI) standard ...
